Zdolbuniv, Rivne Oblast, Ukraine • holombik@gmail.com • +380673457015 • LinkedIn • Portfolio • GitHub
Gameplay Programmer with 4 years of experience building gameplay systems and mechanics in Unity and Unreal Engine using C++ and C#. Focused on gameplay architecture, performance optimization, and designer-friendly tooling.

Experience

Zagrava Games

Remote

C++ / Unity Gameplay Programmer

March 2022 – Present

- Developed gameplay systems and features for mobile games using C++ and Unity (C#)
- Implemented gameplay mechanics and event-driven systems in collaboration with designers
- Integrated and configured FMOD audio systems for gameplay events and interactions
- Optimized gameplay systems, refactored legacy code and improved runtime performance
- Developed internal tools and Python automation scripts for content pipelines
- Collaborated with artists and designers to integrate and maintain gameplay assets
- Worked with Stable Diffusion workflows for AI-assisted content generations
- Mentored team members and contributed to internal knowledge sharing

Independent Game Developer

Remote

Unreal Engine / Unity

April 2022 – Present

- Developed VR survival game systems in Unreal Engine (C++) including responsive foliage interaction, physics-based destruction, and Chaos damage simulation
- Engineered modular gameplay architecture with Blueprint-integrated C++ systems, improving designer workflow and feature scalability
- Implemented stealth shooter mechanics including AI perception, enemy awareness, sound propagation and cover-based combat behaviors
- Optimized character movement and animation blending for smooth stealth-to-combat gameplay

Education

National University of Water and Environmental Engineering (NUWM)

Rivne, Ukraine

Master of Computer Science

2021 - 2022

Thesis: Custom Game Engine Development in C++ and OpenGL

Relevant Coursework: Object-Oriented Programming, Software Design Patterns, Computer Graphics

National University of Water and Environmental Engineering (NUWM)

Rivne, Ukraine

Bachelor of Computer Science

2016 - 2021

Thesis: Mobile Augmented Reality Application for Architectural Visualization using Unity

Relevant Coursework: Artificial Intelligence, Cross-Platform Development, Linear Algebra

Leadership & Activities

Zagrava Games Game Jam

Remote

Gameplay Programmer

January 2022

- Collaborated in 4-person team including programmers, VFX, and environmental art roles during a local game jam
- Developed gameplay systems in Unity for a project awarded 2nd place by Zagrava Games

Skills & Interests

Technical: Unreal Engine 4/5, Unity, C++, C#, Blueprints, Gameplay Programming, AI Systems, Python, Git

Language: Ukrainian (Native), English (Intermediate)

Interests: Game Development, Interactive Technologies, Gaming, Learning New Tools
